

SMOG X 210 SV

Optimal solution, the SMOG X 210 SV anti-smog domed half mask, with absorbent “comfort” sealing, which serves as additional safety measure and absorbs sweat. The SMOG X 210 SV anti-smog half-mask with valve efficiently filters particles smaller than 2 µm. It is used to protect the respiratory system against the inhalation of PM10 and PM 2.5 dust, connected to smog, along with the carcinogenic, polycyclic aromatic hydrocarbons (PAHs) that often attach to them: benzo(a)pyrene, naphthalene – carcinogenic and strongly poisonous substances. The half-mask design allows free breathing, and so is useful in daily life, on the way to work or school. Filtration protects our respiratory system, so it is advisable to use the anti-smog half-mask even on short-time stays in environments where smog norms are exceeded.
