

SMOG X 310 SV

The highest degree of protection, professional solutions and additional filter media used in SMOG 310 SV guarantee effective protection even against PM 1 suspended particles. The SMOG X 310 SV is also equipped with an absorbent "comfort" seal that further protects and absorbs sweat, providing a high standard of use. The half-mask design allows free breathing, and so is useful in daily life, on the way to work or school. Filtration protects our respiratory system, so it is advisable to use the anti-smog half-mask even on short-time stays in environments where smog norms are exceeded. Modern design, delicate materials and stylish black colour of the mask are the features meant especially for demanding users.
