

TECHNICAL SHEET LA 10 250 10

LOAD ARRESTER 10 M, MAX. LOAD 250 KG

Load Arrester designed to stop the fall of a load with a maximum weight of 250 kg

- Load Arresters allow to stop the fall of a load (basketball hoop, ramp lighting, industrial machine,...) on a short distance in case of:
 - breaking of the chain or the wire rope which is used to lift the load,
 - breaking of the fixing elements at the top of the load.
- Casings made up of high impact strength polymer, nearly indestructible.
- Multi-ratchet quick fall arrest system.
- Integrated energy absorber, which reduces the efforts on the structure.
- Reduced fall arrest distance.
- Max. 60 cycles per day.

Wire rope length:	CE	Weight:
10 mtrs		4.15 kg

Material of components:

Casings: Polymer
 Wire rope: Galvanized steel, diam. 4.8 mm.
