HIGH QUALITY

RELIABILITY

WEAR COMFORT

PERFECTLY SEALS

- Full respiratory and eye protection, compatibility with other ppe products
- Panoramic viewfinder providing peripheral vision and maximising light, anti-scratch, anti-fog
- Extremely lightweight, well-developed design, easy to use (easy to put on and take off)
- Four-point head stripes with high flexibility and resistance to low temperatures, mounted symmetrically to prevent local head pressure
- The bayonet connector of the air-purifying components is an easy clear way to set up the filter, which results in better weight distribution and balance of the system
- Easy access to membrane replacement and mask disinfection
- Silicone body provides exceptionally good flexibility at low temperatures and higher wearing comfort
- Coupled and sealed design of the inner mask and body ensures less heat build-up and prevents fogging of the viewfinder

EN 136:1998
Class 2: Full mask
general use

Packing: The mask is packed individually in a cardboard box with dimensions of 250/210/155.
Net weight: 414g

4 pieces in a collective carton with dimensions of 425/315 / 280mm
Carton weight 1.66 kg

ECONOMIC

COMFORTABLE

EASY TO MAINTAIN

SKIN-FRIENDLY

- The ergonomic and flexible shape provides a super tight fit, and the design ensures that it can be used for a long time
- Simple design for easy access and quick inspection of the breathing membrane by removing the cover of the exhalation component
- Low profile and compact design for excellent visibility and limits the number of places where dirt accumulates
- The bottom-directional exhaust valve eliminates the risk of fogging
- Glasses and protects the membrane against accidental particles
- Tight joints of air-purifying components arranged so as to create compatible connection with filters and absorbers, increases all qualities of the respirator
- Universal in use thanks to a wide range of filters and absorbers. compatibility with other ppe products
- Strapping provides additional drop down function providing comfort during breaks

EN 140:1998

Packing: The mask is packed individually in a poly bag.

Weight of 1 piece: 150g

20 pieces in one carton with dimensions of 500x445x165mm
Carton weight 3 kg
